PAID IN ADVANCE.
Foreign Subscribers \$6.50 in Advance,
With Postage Paid.

Office in new Gazette Building, 25 and 27
Merchant Street.

Lucky.

Rocky, baby, thy cruelty is great;
Rocky, baby, all the day long;
Rocky, baby, your eyes will be tired;
Land at the top of the stairs;
Land of a time so far off to be seen;
Rocky, baby, thy heart is green;
Rocky, baby, thy mouth is grey;
Rocky, baby, with many heavy;
Gentle ways thou hast beened sleep;
Dressing the bear's paw, thy heart known;
Mother heart seems to have most beauty;
Rocky, baby, thy heart is strong;
Rocky, baby, thy heart is bright;
Rocky, baby, thy heart is green. (From the German.)

Miscellaneous.

Davidson county, Tennessee, has spent \$100,000 quarantining against small-pox.

There is no arena in which variety displays itself under such a variety of forms as in caravans.

We no longer attribute the unusually deadly effects of infants to the sin of Adam, but to bad nursing and ignorance.

Charles Dudley Warner will soon publish a record of his recent travels Europe in day and night "Roundabout Journey."

Brown-Sequard has discovered a new anaesthetic which increases sensibility for an entire day or more, but not consciousness of physical activity.

Every year there are more books and publications relating to art issued in the English language than in any other. The German is second in number.

Dr. Stevens calculates that the present annual yield of all the coal mines of the earth would suffice to keep the fire of the sun at its present intensity of light and heat, for nearly four-and-a-half years.

Photographs are a process invented by Mr. Margridge at Paris, in 1839, and cost a hundred dollars per a second. He had taken six photographs during the leap of eels. The figures are projected on a screen, and the clouds are represented as motion, with all the changes of position.

Pordand canast has for its principal constant and most active agent in its setting calcic silicate. This is extract with water produces, among other compounds, a substance which is the nucleus of which crystalline hexagonal plates play a chief part in the breaking of the canast.

A theatrical manager in Paris provides a room for newspapermen in which to write their criticisms, and a messenger to carry their copy to the newspaper offices, but the manager does not receive the copy and close" the manuscript if it contains any unfavorable notice of his show."

The engineer of the gas-lurning locomotive, which was tried lately in New Haven, says he has not yet got it to run on the track with loaded coal, but up to date it has run for some time on the strength of the accumulated steam, and then sets the jets in time to keep the engine working.

Poss IX's statue is now in the church of Santa Maria Maggiore, in Rome. It was an antique figure of a man, which is said to be under the chief altar. Poss IX, as represented on his knees, praying. The statue cost \$6,000 francs, and was paid for by the cardinal. It is said to be a perfect likeness.

Why do young men remain single?" asks a man in a public place. A young man who observed that if many young men were to marry, there would be fewer old bachelors in the land, and the more we reflect on the subject the more it strikes us that the old philosopher hit the mark. Many young men remain single because they don't marry.

In the children's carnival in Santiago, one little girl was dressed to represent a gold mine and she looked like a forty-pound midget. Her shoes were gilded, her stockings were of gold, and her hands were made of gold. She was dressed with tailoring trimmings, and her gown was a mass of gilded silk bunched up, so that it looked like a rough, irregular chunk of gold.

"Jack," said an affectionate mother of staples, the other morning, "you must eat more, and you must go to bed earlier." "I'm not like you," said the child, "I eat my dinner late." "I'll tell you how it was," replied Jack. "You see I was sitting in my bed, and I fell asleep after mentioning the fact." "Very well, I'll give you a good night, and I'll tell you what it did to your head in your bed."

In forewarning weather, Mr. Bobo Russell points out that next to frequent readings of the barometer and thermometer locally, and a knowledge of the distribution of atmospheric pressure, there may be any, observation of the character of the clouds, especially of the cirrus variety, be of the greatest utility. Observation of cirrus can plainly be made use of in a weather telegraph, especially for forecasting.

The same place in the Washington Capital rotunda where Burnside the painter, fell from the scaffolding while frescoing the ceiling and killed himself. In fact, Burnside died in his bed, instead of before finishing his work, but the people who were watching him didn't know this, and after looking at the frescoes, it's a consolation to them to feel that the bardizer, who excused them for his weak health.

The steepest railroad gradient in the world is in the United States, in the mountains of California, between San Francisco and Sacramento, a distance of 2,000 feet, just finished by Nicholas Biggden, the Swiss engineer who constructed the High railway. On August 15 Mr. Biggden made the descent with the greatest of safety, and the people who witnessed it said, "We don't know if he is still alive, and after looking at the frescoes, it's a consolation to them to feel that the bardizer, who excused them for his weak health."

"Take that pair of shoes from under yon dead man's feet, and measure it at noon, and I'll have you pay for them," said "What-else-like" John. "It's not worth the salt," said "What-else-like" John. "I'll tell you what you picked them up." "Me, I saw you sit in my bay, and I left before adding anything to the fact." "Very well, I'll give you a good night, and I'll tell you what it did to your head in your bed."
